SkaatunBoden – SkaatunBoden Funkis

2022 -Desember

SKAATUNBODEN

SkaatunBoden er en egenutviklet serie av redskapsboder i høy kvalitet som kan møte de fleste behov for ekstra plass. SkaatunBoden kommer i modeller fra 6 til 15 m².

Bodene blir produsert i seksjoner, noe som gjør systemet svært fleksibelt. Du som kunde velger selv hvor vinduene passer best, om du trenger takutstikk over døren eller en skillevegg innvendig.

SkaatunBoden kommer i to hovedserier, SkaatunBoden og SkaatunBoden-Funkis. Med SkaatunBoden-Funkis kan man også velge å ha døren på kortsiden, eller om man ønsker en tofløyet dør som forenkler innkjøring med motorsykkel eller lignende.

SkaatunBoden er vellegnet til alt fra sportsbod i hagen til anneks på hytten. Med sine lette seksjoner er den enkel å transportere og montere. SkaatunBoden kan leveres med isolerte vinduer og gulv, og er godt egnet for fullisolering.

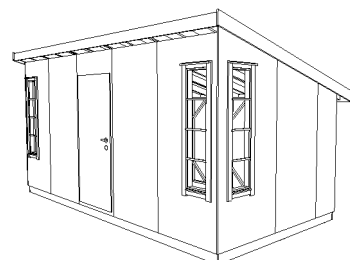

SkaatunBoden blir produsert i former i våre egne produksjonslokaler. Alle vegger har skråstøtter i rammeverket, noe som gjør at vi kan produsere seksjonene i små dimensjoner uten at det går utover styrken.

Skaatunboden leveres komplett, med god kvalitet på samtlige deler som medfølger. Bl.a medfølger gulv, isolert dør med sylindrlås og Icopal takshingel.

På grunn av sin lave egenvekt og måten den er bygget opp på, krever ikke SkaatunBoden en tradisjonell grunnmur. I de aller fleste tilfeller vil det være tilstrekkelig med frostsikre fundamentspunkter som ligger på fast underlag.

Du monterer SkaatunBoden selv på en helg, om ønskelig kan vi ta oss av monteringen (Bergensområdet).
